

BCYP EPaCCS Resources

The following resources have been put together to assist with referring to the EPaCCS, identifying those already on the register and viewing and updating key information about them. If your SystmOne unit is part of the Essex organisation group, these will already be available in your unit. If not, please email askquality@havenshospices.org.uk and we can provide exported copies.

Referral

A preset referral has been setup via a protocol (BCYP EPaCCS Referral). Once launched, it will display the criteria, give the option to update key information and then allow the referral to be sent.

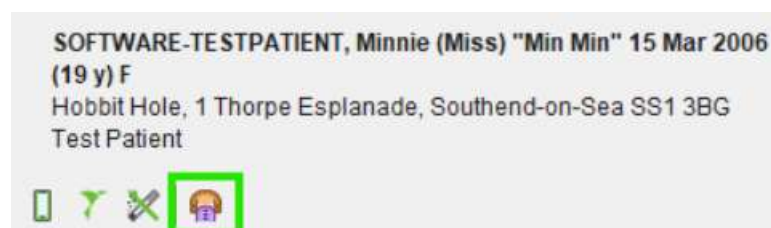

If the protocol is not being used an electronic referral can be sent to:

Unit Name: **MSE Baby, Children and Young Persons EPACCS**

Unit ID: **591032427104**

Patient Status Alert

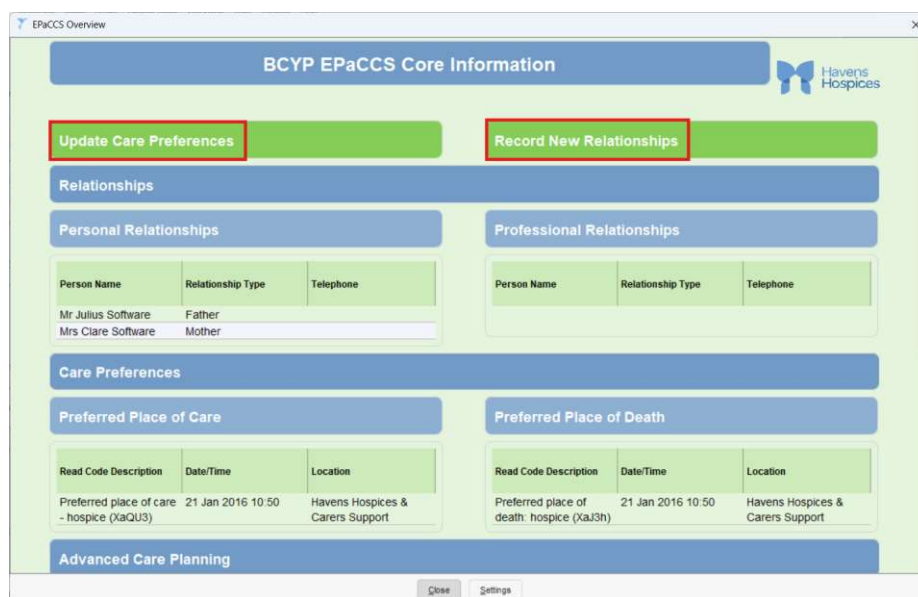

Once a referral has been accepted, an icon will appear to indicate the child is on the register.

Clicking the icon will show the most up to date key EPaCCS information.

Visualisation and Template

Where key EPaCCS information is recorded it can be displayed in a visualisation, launched from clicking the icon above.
